

Omnivore

Supported POS Software: <https://www.olo.com/omnivoreapi>

- [Omnivore Micros Symphony](#)

Omnivore Micros Symphony

Required Info

- **Symphony version**
- **Is it hosted?**
- **Name of the Property to be integrated**
- **Number of Revenue Centers to be integrated, and their names**

If your Symphony version is 2.x or if your Enterprise is on-premise, please skip this section and move to the next. To proceed with our integration into your Symphony system, we request login information for EMC. If you are using a hosted version of Symphony, could you help us get a read-only user set up with permission to view settings from the enterprise level? In order to log in we will need:

- **Server URL**
- **User Name**
- **Company**
- **Password**

We also require Transaction Services. Please use the following information to reach out to Oracle or your re-seller to request they install, configure, and test Transaction Services for your system if you haven't already:

- License: Guest Facing Transaction Services
- Configuration: Add a POSAPI Client
- CAL: Add the Transaction Services role to a host workstation and allow CAL to install the required files
- Testing: Use TSDemoClient to confirm Transaction Services is functioning correctly
- **Results: Reply to Omnivore Support with the Employee ID and RVC number (#) used for testing**
